

ORDER OF PUBLIC HEALTH MADISON & DANE COUNTY

DATE OF ORDER: April 2, 2021
Goes into effect April 7, 2021 at 12:01 a.m.

EMERGENCY ORDER #15

Since Emergency Order #14, Dane County has achieved a continued decrease in cases and hospitalizations. ICU levels have remained steady throughout March, with an average of 8 people in the ICU with COVID as of March 31, 2021. On March 10, when Emergency Order #14 was enacted, the 7-day case average was 55 and the 7-day hospitalization average was 23. As of April 1, case average and 7-day hospitalization average were similar—51 and 23, respectively.

Reducing the spread of illness, preventing severe outcomes, and death remains a foundational public health goal of managing the pandemic—a goal that is becoming more attainable as case rates decrease and vaccination coverage increases. As of April 1, 89.2% of people aged 65 and older in Dane County had received at least one dose of vaccine—a critical step in protecting the population most at risk of severe outcomes and death.

A cautious, and stepwise reopening has remained Dane County's approach—an approach that has likely contributed to Dane County having one of the lowest case rates in the state despite it being a population center. Masking, distancing, and staying outdoors remain key prevention tools, particularly given that a more transmissible variant of concern has been detected in Dane County. However, now we have an even more impactful prevention tool—vaccination.

In response to the steady trend in cases and hospitalizations alongside the increasing rate of vaccination, these orders take continued steps toward reopening.

Based upon the foregoing, I, Janel Heinrich, Public Health Officer of Madison and Dane County, by the authority vested in me by the Laws of the State, including, but not limited to, Wis. Stats. Secs. 252.03(1), (2) and (4), order the following as necessary to prevent, suppress, and control the spread of COVID-19:
